

Worldspan Trip Manager®

SUMMARY

Worldspan Trip Manager is a proven corporate online travel management solution that enables corporate travelers to book travel reservations quickly and cost effectively.

Developed by the leader in travel e-commerce, Trip Manager is the safe choice by more than 1,100 corporations worldwide to streamline and control the travel management process. This comprehensive, end-to-end solution enables corporations to save up to 20 percent annually on travel costs, commonly the second highest controllable corporate expense.

When using Trip Manager, business travelers enjoy a user-friendly, yet powerful travel management tool that offers the most convenient and efficient way to plan and book trips. They are able to choose from a wide selection of air, hotel, and rental car options—all within corporate travel policy—

and can easily book complete trip itineraries in less than four minutes. With 24/7 access, expert technical assistance, and Help Desk support, business travelers never travel alone.

Trip Manager ensures employee compliance with travel policies and consolidates company-wide purchases, resulting in more cost-effective travel management. Enhanced reports help corporations gain better insight into their travel expenditures—enabling them to strengthen preferred supplier relationships and establish better negotiated fares programs to lower overall travel management costs.

A scalable and reliable solution, Trip Manager fully integrates travel into existing enterprise systems and is continuously enhanced with new features and capabilities.

FEATURES

Cost Control: Access to more data and enhanced reports gives corporations the power to better understand and manage costs. Corporations using Worldspan Trip Manager reduce travel costs by up to 20 percent.

Convenience for Travelers: Worldspan Trip Manager is a Web-based product, accessible 24/7 from anywhere in the world.

Compliance with Choice: Travelers get a wide variety of choices, all in line with their company's travel policy.

Convergence: Trip Manager further streamlines the travel management process by integrating into existing enterprise systems.

Customer Care: Corporate travelers never travel alone. The Help Desk, consultants, technical specialists, and Worldspan's account managers are at their service.

Comprehensive Trip Planning Options: Booking features include seat selections from "live" seat maps, integrated fare and availability displays, and easy access to pre-established traveler preferences.

Lowest Available Fares: By integrating with the global Worldspan Power Shopper® and Worldspan Power Pricing® low fare search engines, Trip Manager offers travelers access to the lowest available fares. It is also enhanced with exclusive Worldspan Web AirFare search technology. Web AirFare allows Trip Manager users to compare special low fares, offered only through airline Web sites, against published and negotiated fares to find and book the best travel value.

Web-based Reporting through Worldspan Report ManagerSM: An integrated reporting system provides valuable insights into savings opportunities by capturing and analyzing travel patterns and spending habits—leading the way to enhanced supplier relationships and better negotiated fares programs—to lower overall travel management costs.
